

Box Sash Windows

Life Engineered.

PVCu Box Sash Windows

01_Classic

Modern, secure, virtually maintenance free and manufactured from high impact, durable PVCu.

PVCu box sash windows authentically replicate the look of timber but are virtually maintenance free. They are hand-crafted to your dimensions by us in Macclesfield, using very similar skills and techniques to those employed in joinery workshops.

The thermal properties of PVCu are excellent and these windows can be supplied in a wide range of finishes. From six feet away it is extremely difficult to tell if the window is timber or PVCu.

Box sash window tilting action

- coupling mullions
- shaped frame heads
- window energy rating 'A'
- trickle vent option
- fire egress.

The Mayfair makes an identical luxury statement embodied by traditional timber box sash windows. A frame with all of the attributes of the KAT Elegance, plus the advantage of all frame and sash elements being mechanically joined in a similar method to the time honoured British joinery techniques of traditional timber sliding sash windows.
