IT'S ALL IN THE DETAIL

# REHAU – THE NAME YOU CAN TRUST

ADVANCED TECHNOLOGY...BREATHTAKING STYLE

---

REHAU Tritec window and door systems combine the latest advances in technology with unrivalled design. Elegant and attractive, yet practical, durable and energy efficient, REHAU Tritec systems offer quality and style that is simply superior.

As the leading European manufacturer of PVC-U window and door systems, REHAU enjoys an enviable reputation for quality and design. With over 40 years' extensive experience in producing the highest quality PVC-U systems, our exceptional products ensure your installer receives only the best windows and doors for your home or workplace.

So – whether you're searching for REHAU window and door systems (available in modern White or traditional woodgrain finishes such as Mahogany, Rosewood and Golden Oak) or complete PVC-U buildings solutions for a new or more energy efficient home – log on to [www.rehau.co.uk](http://www.rehau.co.uk) to find out more.

# REHAU – THE NAME YOU CAN TRUST

## QUALITY FOR LIFE

Behind every REHAU Tritec door and window system, you'll find unmistakably superior craftsmanship and inspired design to make your life better. Systems offer:

### Heat and energy-saving technology

Much of the heat loss from a building occurs through glazing. REHAU Tritec's special three-chamber design enables your home to enjoy greater thermal efficiency. Your new REHAU Tritec window and door systems can be made more energy-efficient to achieve a BFRC\* energy rating from C to A (the highest possible rating), depending on the specification you choose, to keep your home warmer and reduce draughts. They also save you money on heating bills. Ask your installer for more details.

Plus, REHAU Tritec systems help to conserve the environment too, by complying with building regulations on the conservation of fuel and power.

### \*BFRC stands for the British Fenestration Rating Council

The BFRC is an independent, government-backed initiative set up to enhance the energy performance of buildings. Window systems can be rated from A (the highest energy performance) to G (the lowest). Windows that are C rated or better – like your new REHAU Tritec windows – are included in the Energy Saving Trust scheme and achieve an Energy Saving Recommended mark, which offers you increased peace of mind – and of course, increased energy savings.

Energy Index (kWh/m <sup>2</sup> /year) <small>(Energy Index certified by BFRC and based on UK standard window. The actual energy consumption for a specific application will depend on the building, the local climate and the indoor temperature)</small>	2
The climate zone is:	UK
Thermal Transmittance (U <sub>window</sub> ) Solar Factor (g <sub>window</sub> ) Effective Air Leakage (L <sub>factor</sub> )	1,35 W/m <sup>2</sup> .K 0,43 W/m <sup>2</sup> .K 0, W/m <sup>3</sup> .K
 Reg. No.: 336 <a href="http://www.bfrc.org">www.bfrc.org</a>	
<small>This label is not a statutory requirement. It is a voluntary label provided as a customer service to allow consumers to make informed decisions on the energy performance of competing products.</small>	

### Halving outdoor noise

REHAU Tritec door and window systems enable you to enjoy peace and quiet too. Used with double-glazed sealed units, they can easily halve outdoor noise levels.

### Offering greater household protection

The REHAU Tritec door and window systems' tough and durable designs help reduce break-ins. They comply with the BS7950 and PAS 23/24 window and door security standards and feature strengthened areas where locking mechanisms are to be fitted, to help protect both you and your property.

### Requiring little or no maintenance

REHAU Tritec doors and window systems contain a unique compound and have a smooth gloss finish – which ensure they retain their pristine appearance. It also means they will never warp or need regular painting – unlike their wooden counterparts – for superior quality that doesn't grow on trees.

### Providing a great deal more

REHAU Tritec can be ordered as part of an integrated window and door system package to ensure uniformity of quality, workmanship and great design. For absolute peace of mind, REHAU Tritec window systems are also kitemarked to BS (British Standard) EN12608:2003 and by the BBA (British Board of Agreement, No. 1930). For more details on the accreditations gained by REHAU windows and door systems, please visit [www.rehau.co.uk](http://www.rehau.co.uk)

# WINDOW SYSTEMS

## STYLES TO SUIT ALL HOMES

---

Whatever look you want to achieve for your home, your installer will ensure the design of your new window system blends in perfectly.

### **Designs include:**

- casement windows with internal or external beading
- bay or bow casements
- French windows – ideal as fire escape windows
- 'tilt and turn' windows (great for easy cleaning from the inside)

### **'Invisible' gaskets offer a better finish**

REHAU Tritec window and door systems have been specially designed to feature low-level gaskets on both frames and glazing beads, which means your gaskets will be much less obtrusive than traditional ones. In fact, they're almost invisible.

REHAU also offers complementary profile and gasket colours. These include silver grey gaskets with white profiles, dark brown with Mahogany and Rosewood profiles and acorn coloured gaskets for Golden Oak profiles.

### **A modern or traditional finish?**

The contemporary look created by REHAU Tritec window systems suits most homes. But if you prefer a more authentic look, your REHAU Tritec

system frames can also replicate traditional joinery features. These include sculptured sashes and matching sculptured glazing beads, sash horns and clip-on Georgian bars, for a nostalgic period look with all the benefits of a modern window. However, if you're looking for a modern window to complement your property, then chamfered sashes are the ideal choice.

---

# DOOR SYSTEMS

## CREATE A GREAT FIRST IMPRESSION

---

Offer everyone a warm welcome to your home with a stunning REHAU Tritec door system. Beautifully made and stylishly practical, the range includes a design to complement every home:

**REHAU Tritec door systems include:**

- French doors – the popular alternative to sliding patio doors
- residential doors
- composite doors
- ‘tilt and slide’ patio doors
- stable doors – particularly suited to older style properties
- multi-fold doors – to maximise the available opening. Weather tested for external use, they also provide the ideal solution for indoor open-plan living or dividing large spaces for commercial use
- porches and conservatories – providing the window and door elements

### **Wheelchair friendly**

Wheelchair-bound residents and visitors can enjoy easy access to your home, because all REHAU Tritec door systems comply with the latest building regulations and boast low-level threshold options.

### **Better household protection**

REHAU Tritec door systems can offer your home better levels of security, because all door hardware can be fixed into the steel reinforcement. Conforming to British Standard and Secured By Design safety standards, doors feature strengthened areas around locking mechanisms, making it very difficult to force entry.

### **Extra ways to create more space**

Additional features can be added to your doorway to create more space. Why not think about adding:

- a stylish porch – to provide a spacious feel for your home
- a conservatory – a stunning way to create an extra room within your home. See the REHAU Conservatories brochure for more details.

# WINDOW AND DOOR SYSTEMS

## EYE-CATCHING FEATURES TO FOCUS ON

You can customise your window and door systems with our exclusive range of extra features, to create a truly unique look for your home.

### Tailor your windows and doors

Although the REHAU Tritec system frames enjoy all the energy-saving and security benefits that come from being crafted in durable PVC-U, simple extra features mean you can still achieve an authentic traditional look for your home. So you can enjoy the best of both worlds!

### Why not add:

- Run-through sash horns – these provide an authentic touch and are made from the same material and colour as your chosen frames.
- Arched head inserts – they help to create that traditional cottage look.
- Clip-on Georgian bars – for a quality, period finish.

### 154 colours to choose from

In addition to modern White, or Rosewood, Mahogany and Golden Oak for a more natural finish, there are a further 150 colour options to choose from, using the unique REHAU Acryl II colouring system. Simply ask your installer for more details.

### Match your windows to your décor!

You can even install windows that complement your interior décor – for example, a clean white finish on the inside, but a different colour or effect on the outside.

### Glass as beautiful as the frames it rests in

Choose from clear, patterned or stained glass. If you have a more traditional property, then leaded or bevelled glazing styles can create an extra-special look.
